1.3 – FCC Information

DECLARATION OF CONFORMITY:

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC RELATED INFORMATION:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

1.4 – Disposal at End-of-Life

This product must not be disposed of by incineration, landfilling, or mixing with household trash. Improper disposal of the battery contained within this product may result in the battery heating up, rupturing, or igniting which may cause serious injury. The refrigerants contained inside the RolliCool present chemical risks to the environment. The recommended disposal for any RolliCool 310 Portable AC with Heater at its end-of-life is to dispose of the entire unit by contacting your local recycling company. Local regulations and laws pertaining to the recycling and disposal of any RolliCool unit and/or products containing them will vary according to your country, state, and local governments. You must check laws and regulations corresponding to where you live in order to dispose of your RolliCool unit properly. It is the user's responsibility to dispose of their equipment properly in accordance with local regulations and laws.

For additional information about where you should drop off your RolliCool unit, please contact your local or regional waste management office, your household waste disposal service, or your point-of-sale.

Window Kit Parts

Sections

These sections thread into one another and should be placed within a window gap.

Screw Fastener

These parts are used to secure the sections together and can be loosened or tightened when adjusting the sections according to window height.

Installation

Step 1. Separate one screw fastener and thread the screw base into one end of Section B.

Step 2. Thread Section A onto the end of Section B and use the screw head and washer to secure the sections together.

Step 3. Attach the wheels (if needed) and roll the unit into the desired room. In the moving process, ensure that the unit is in an upright position and the RolliCool is placed on a flat surface.

Step 4. Attach the included heat exhaust pipe to the air vent on the back of the unit. Unfold the pipe to the necessary length.

Step 5. Install the assembled kit into a gap between the window and the frame and push the window nearly closed to secure it. Turn the screw head to tighten or loosen the screw fastener and adjust the sections as needed.

Step 6. Attach the heat exhaust pipe to the window kit. If desired, add a screw to the end of the heat exhaust pipe to further secure it to the window kit.

 *Make sure the exhaust pipe is not bent or kinked as this may inhibit air flow and/or damage the unit.*

Section 4. Wireless Setup

For your convenience, there is an app for this device. The app is compatible with most Android and iOS smartphones. Additionally, the unit can also be paired with Alexa and other products from the Amazon Echo Family.

4.1– App Installation

Step1. Use your smartphone to search the Play or App Store for the “RolliCool” application.

Step2. Download and install the app according to your operating system.

4.2 – App Pairing

-  • *Powering on the RolliCool will automatically enable Bluetooth® i.e. Bluetooth® will become enabled and stay enabled as long as the RolliCool is turned on.*
- *For instructions on how to turn on Bluetooth®, consult materials for your Bluetooth®-enabled smartphone.*
- *As with most Bluetooth® devices, it is recommended to keep the connected devices at least 32 ft. within each other. The connection may be terminated or fail to work properly if the connected devices are too far apart.*

Step 1. Turn on the AC unit then use your phone to turn on Bluetooth® and open the app.

Step 2. Register for an account and return to the app (fig.1).

Step 3. After logging in, select the desired device type and tap the **+** icon.

Step 4. Select the access mode and enter wi-fi and Bluetooth® info as needed (fig.2).

Step 5. Turn off the AC unit then press and hold the mode button on the unit's control panel for ~5 seconds. The app will begin pairing.

Step 6. After connecting successfully, the app can be used to set schedules, change modes, and more (fig.3).

Your device may be set to a different model name by default. To change the device name, tap "More" in the upper corner then select "Rename device" to enter a new name for your COOL310.

fig.1

fig.2

fig.3

4.3 – Amazon Alexa Setup

Step 1. Search "RolliCool" in the Amazon Alexa app home screen (fig.4).

Step 2. Select the RolliCool app and tap "ENABLE" (fig.5).

Step 3. Login your RolliCool account and tap "Link Now". Follow any additional in-app instructions as needed (fig.6).

fig.4

fig.5

fig.6

- *Make sure Amazon Alexa app and RolliCool are connected to the same wi-fi otherwise Alexa may not be able to discover your AC unit.*
- *Connect both your AC unit and Alexa to a stable wi-fi network. If your wi-fi is unstable, Alexa may disconnect and not work correctly with your RolliCool.*

Section 5. How to Use the RolliCool

The 310 features a number of ways to keep comfortable. Most features can be used by pressing the buttons on the unit's control panel, the remote, or via the app.

- In most cases where the remote can be used, the app can also be used as a substitute.
- To keep the COOL310 from filling up with water too quickly when certain modes are used, it may be best to attach the drainage hose. It's recommended to attach the hose to the upper opening when using cool or dehumidify modes and to attach it to the lower opening when using heat mode. See Section 6.2 for information.

5.1 – Timer Mode

With this mode, the unit will automatically turn on or off and regulate temperature according to the selected times.

- Turning timer mode on when the unit is off means setting the time the unit will turn on.
- Turning timer mode on when the unit is on means setting the time the unit will run before it shuts off.
- After setting the timer, the AC unit will enter timer mode. While the unit is in timer mode, it will operate according to the selected timer duration. Pressing the timer button again will turn timer mode off and cancel any duration setting.

To Set a Turn On Time

1. When the unit and remote are off, press the timer button on the control panel or remote.
2. Use the up and down buttons (left/right on the remote) to select the time the AC unit will turn on i.e. selecting "03" will prompt the unit to turn on in 3 hours' time etc.
3. After the selection is complete, the display's "Hr" light will turn on.

- When a schedule is active, the unit will not turn on if the chosen temperature is higher than the indoor temperature.

To Set a Shutoff Time

1. When the unit and remote are on, press the timer button on the control panel or remote.
2. Use the up and down buttons (left/right on the remote) to select the time the AC unit will turn off i.e. selecting "03" will prompt the unit to turn off in 3 hours' time etc.
3. After the selection is complete, the display will show the current indoor temperature and the "Hr" light will turn on.

5.2 – Fan Mode

With this mode, the unit will turn on and begin using the fan to promote air circulation.

1. Press the power button on the control panel or remote.
2. Press the mode button on the control panel or remote multiple times until the "Fan" light turns on.
3. Use the fan button to cycle through speeds.

5.3 – Cool Mode

With this mode, the unit will turn on and regulate temperature as selected.

1. Press the power button on the control panel or remote.
2. Press the mode button on the control panel or remote multiple times until the display's "Cool" light turns on.
3. Use the up and down buttons (left/right on the remote) to set the desired temperature 61~88°F (16~31°C).
4. Use the fan button to cycle through fan speeds.

When cool mode is active, the unit will not turn on if the chosen temperature is higher than the indoor temperature.

5.4 – Dehumidify Mode

With this mode, the unit will turn on and begin removing moisture from the air.

1. Press the power button on the control panel or remote.
2. Press the mode button on the control panel or on remote multiple times until the display's "Dry" light turns on.

In dehumidify mode, the fan speed is automatically set to low and cannot be adjusted.

5.5 – Heat Mode

With this mode, the unit will turn on and begin outputting the hot air.

1. Press the power button on the control panel or remote.
2. Press the mode button on the control panel or on the remote multiple times until the display's "Heat" light turns on.
3. Use the up and down buttons (left/right on the remote) to set the desired temperature 61~88°F (16~31°C).
4. Use the fan button to cycle through speeds.

5.6 – Sleep Mode

With this mode, the unit will turn on and begin operating at a low speed. This mode is similar to fan mode at low fan speed and functions as a way to aid sleep especially if you are used to light noise around bedtime.

1. Press the power button on the control panel or remote.
2. Press the fan and up buttons together on the control panel or the sleep mode button on the remote. The display's "Sleep" light should turn on. Press again to turn this mode off.

In sleep mode, the fan speed is automatically set to low and cannot be adjusted.

Section 6. Maintenance

Proper maintenance will help improve your RolliCool's performance. Periodically, the RolliCool will need its filters cleaned. For optimal performance, the filters should be cleaned at least twice a month.

- ! • *If any type of non-routine maintenance is needed, such as any maintenance not described in Section 6 of this manual, please contact customer service or a certified HVAC professional as the unit contains refrigerant.*
- *Wipe the exterior clean with non-abrasive cloth. If needed, cloth can be dampened with water.*
- *Do not use harsh chemicals to clean as these may damage the unit.*

6.1 – How to Clean the Filters

- ! • *Please make sure your AC unit is completely powered off before performing any type of maintenance.*
- *Do not scrape the air filters as they may sustain damage.*
- *A hand vacuum may be used to clean the filters.*
- *Replace the filters after cleaning. Do not use the RolliCool without the filters.*
- *If water has been used to clean any filter, ensure it is completely dried before reinstalling. Do NOT dry any filter in direct sunlight.*
- *DO NOT wash the black carbon filter. Only the other two filters may be washed.*

Cleaning the Upper Filter

1. Reach under the notch and remove the screen cover.
2. Using a screwdriver, remove the four screws from the filter.
3. Remove the filter and soak it in lukewarm water or use a vacuum to clean the filter. Mild detergents may be used.
4. After the filter has completely dried, reinstall it.

Cleaning the Lower Filter

1. Reach under the notch and remove the filter.
2. Soak it in lukewarm water or use a vacuum to clean the filter. Mild detergents may be used.
3. After the filter has completely dried, reinstall it.

6.2 – How to Drain the Unit

In most cases, the AC unit will not require draining. In the event that draining is necessary, the unit will sound an alarm and the display's "Full" light will turn on to indicate the water reservoir inside is full.

- Please make sure your AC unit is completely powered off before performing any type of maintenance.
- If relocating the unit before draining, move it carefully so as not to spill the water inside the reservoir.
- Make sure the drainage pipe has adequate space underneath for draining. If using the lower drainage opening, ensure there is a suitable area for water runoff. If using the upper drainage opening, fetch a container for water runoff before connecting the pipe.
- Keep the drainage cover and the water plug on at all times when not draining the unit.
- When draining the unit, do not allow the power cord to come in contact with water.
- During drainage, the unit may be tilted slight backwards to promote faster drainage.
- Keep in mind the unit may hold more water than expected. If using a container, do not use a small one or either take care of drainage outdoors.

Using the Upper & Lower Drainage Openings

Remove the pre-installed caps and covers as needed. The covers will be used for draining.

Drainage Parts

Plug

Pre-installed. This piece keeps any water from draining out unexpectedly.

Cover

Pre-installed. Screws over the opening to secure the plug or connector.

Drainage Pipe

Fits over the connector and allows water to drain out and from the unit.

Connector

Used to connect the drainage Pipe to the AC unit.

Spacer

This piece attaches to the connector and fits between it and the opening.

Step by Step

 *The steps are the same for both the upper and lower drainage openings.*

1. Turn off and unplug the unit then move it to a suitable location for drainage.
2. Locate the opening, unscrew the cover, and remove the pre-installed plug.
3. Peel the sticker off the spacer and use the adhesive side to attach it to connector.
4. Thread the connector through the cover.
5. Screw the cover onto the opening.
6. Fit the drainage pipe over the connector.

 *If the drainage pipe is too stiff and/or cannot be attached, try soaking the end in hot water to soften it first.*

7. Allow the water to drain.

 *After draining is complete, it is recommended to turn the unit on and run it in fan mode at the lowest speed for at least two hours in order to ensure the drainage pipe dries inside.*

8. Detach the drainage pipe.
9. Unscrew the cover then separate it from the connector. Save the connector for later drainage needs.
10. Reinstall the plug and screw the cover back on to close the opening.

Section 7. Storage

Before storing your RolliCool 310, select a dry, indoor environment. Properly storing your RolliCool will help improve performance and battery life expectancy.

- Step 1.** Turn the unit off.
- Step 2.** Remove the heat exhaust pipe and window kit as needed for storage with the unit.
- Step 3.** Drain the unit of any water and insure all parts are completely dry.
- Step 4.** Turn the unit on and run it in fan mode at the lowest speed for at least two hours in order to ensure the inner reservoir is dried inside.
- Step 5.** Turn off the unit and install the power cord's plug into its fixture on the back of the unit.
- Step 6.** Remove the remote batteries and store separately.

-  *Always turn the unit off before transporting or storing.*
- Cover the unit to protect it from dust. Do not store in a dusty environment as, with all electronic devices, dust may cause damage over time.*
- Store the unit indoors at a dry and stable temperature. Do not store in an unheated garage, shed, or other locations with extreme temperature fluctuations.*

Section 8. Troubleshooting

Problems	Possible Causes	Solution(s)
The unit does not work.	There is no electricity.	Turn it on after connecting it to a socket with electricity.
	The overflow indicator displays.	Drain the water inside.
	The indoor temperature is too low or too high.	Use the unit when the indoor temperature is between 44-95 °F (7-35 °C). Change the set temperature.
The cooling effect is weak.	There is direct sunlight.	Cover any direct sunlight coming through the windows.
	Doors or windows are open; there are a lot of people; or there are other sources of heat.	Close doors and windows.
	The filter is dirty.	Clean or replace the filter.
Excessive Noise	The air inlet or outlet is blocked.	Clear obstructions.
	The unit is not placed on a flat surface.	Put the unit on a flat and stable surface.
Compressor issues	Overheating protection started.	Wait 3 minutes until the temperature is lowered then restart the unit.
The remote control does not work.	The remote and unit are too far apart.	Get closer to the RolliCool and make sure that the remote control directly faces the unit.
	The remote isn't pointed in the right direction.	
	Batteries are dead.	Replace batteries.

When the RolliCool encounters errors, the display may show certain error codes. Refer to the table below.

Code	Possible Cause	Solution(s)
E1	Indoor temp. sensor failure.	Contact customer service for troubleshooting.
E2	EVA sensor failure	Contact customer service for troubleshooting.

If none of the above information resolves your issue, please visit our website at www.rollibot.com or contact customer service at 1-844-585-6295.

Section 9. Warranty

9.1 – Violation

The RolliCool 310 Portable AC with Heater cannot be repaired or serviced within its warranty period if any of the following has occurred:

- The warranty has expired
- Damage occurred during or in relation to non-routine and/or unauthorized disassembly
- Failure to provide a valid proof of purchase when requesting service or repair
- Damage occurred as a result of natural disaster etc.
- Damage occurred due to unexpected factors or man-made reasons (including mis-operation, fluid found in any openings, improper insertion or pulling, hauling, bumping, improper voltage input and others)

9.2 – Information

One Year Limited Hardware Warranty

Your RolliCool 310 Portable AC with Heater (“Product”) includes a One Year Limited Hardware Warranty (“Warranty”). The Warranty covers product defects in materials and workmanship under normal use. This Warranty is limited to residents of the United States and Canada only and is available only to original purchasers. This Warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

This Warranty starts on the date of your purchase and lasts for one year (the “Warranty Period”). The Warranty Period is not extended if the Product is repaired or replaced. We may change the availability of this limited warranty at our discretion, but any changes will not be retroactive.

Warranty services are provided by Warranty Pro (“WP”). If a hardware defect arises and a valid claim is received within the Warranty Period, at its option and to the extent permitted by law, WP will: (1) repair the hardware defect by using new or refurbished parts that are equivalent to new in performance and reliability; or (2) exchange the Product with a product that is new or refurbished which is substantially equivalent to the original product. This Warranty is for one replacement only of like-items and does not cover items out of production if the product is no longer made or stocked. This Warranty is not assignable or transferable. The original purchaser may call WP’s toll-free number at 1-844-585-6295 for a service request.

When a product or part is exchanged, any replacement item becomes your property, and the replaced item becomes WP’s property. This warranty only covers technical hardware defectiveness during the warranty period and under normal use conditions. WP does not warrant uninterrupted or error-free operation of this Product.

This Warranty does not cover any damage due to: (a) transportation; (b) storage; (c) improper use; (d) failure to follow the product instructions or to perform any preventive maintenance; (e) modifications; (f) unauthorized repair; (g) normal wear and tear; or (h) external causes such as accidents, abuse, or other actions or events beyond our reasonable control.

Important: Do not disassemble the Product. Disassembling the Product will void this Warranty. Only WP or a party expressly authorized by WP should perform service on this Product.

DISCLAIMER OF WARRANTY: THE REMEDIES DESCRIBED ABOVE ARE YOUR SOLE AND EXCLUSIVE REMEDIES AND OUR ENTIRE LIABILITY FOR ANY BREACH OF THIS LIMITED WARRANTY. OUR LIABILITY SHALL UNDER NO CIRCUMSTANCES EXCEED THE ACTUAL AMOUNT PAID BY YOU FOR THE DEFECTIVE PRODUCT, NOR SHALL WE UNDER ANY CIRCUMSTANCES BE LIABLE FOR ANY CONSEQUENTIAL, INCIDENTAL, SPECIAL OR PUNITIVE DAMAGES OR LOSSES, WHETHER DIRECT OR INDIRECT.

SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU.

THE DURATION AND REMEDIES OF ALL IMPLIED WARRANTIES, INCLUDING WITHOUT LIMITATION THE WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE LIMITED TO THE DURATION OF THIS EXPRESS LIMITED WARRANTY
